

TWS12

ANP Lighting Collection

Architectural Catenary

The TWS12 is a heavy-duty aluminum catenary fixture, designed to provide both durability and striking illumination for urban environments, public spaces, and hospitality settings. Built to withstand the elements, the LED module and driver are IP66-rated, ensuring long-lasting performance in demanding outdoor conditions.

ANPlighting.com

Suspended Elegance & Structural Strength

Engineered for catenary suspension, the TWS12 is secured via a catenary hub that accepts a 1/4" diameter structural cable, delivering a sleek, floating aesthetic. By default, the fixture is sold as a stand-alone unit, but ANP Lighting offers full structural engineering services upon request, including catenary materials, mounting hardware, and poles. These services are provided by a third-party structural engineer and require an additional 2-3 weeks lead time.

Optimized Light Distribution

The precision-engineered aluminum globe features strategically placed knockouts, allowing light to filter through in a captivating pattern. At its core, the integrated diffusion globe ensures an even, glare-free light distribution, providing comfortable and functional illumination while maintaining the fixture's decorative architectural aesthetic.

Ideal for Urban & Commercial Applications

With its floating presence and refined industrial appeal, the TWS12 is a perfect fit for city streetscapes, pedestrian walkways, outdoor plazas, and high-end commercial spaces. Its robust design, paired with advanced LED technology offers a high-performance, visually-striking lighting solution for modern environments.

Since 1985, ANP Lighting has been inspiring and empowering innovative lighting solutions.

Today, ANP Lighting is a leading manufacturer of energy-efficient architectural lighting solutions for corporate/office, municipal, education, sports and entertainment, hospitality, and retail applications.

Our extensive line of lighting products is complemented by a wide array of mounting, size, and color options – one of the largest selections in the industry. Our in-house lighting experts can help architects, designers, and specifiers develop lighting solutions with the high quality, craftsmanship, and value only products made in the U.S.A. can deliver.
